4. Progression-plan
5. Research Question
6. Additional items

Contact the signatory if you are unable to attend the meeting.

Regards

Kenan Mahic, Trondheim 16. April 2018

Meeting Report

1. Meeting request review
Approved
2. Vision Document
 - a. Author names and document template reference should be added
 - b. The introduction jumps the gun a little bit, we need to introduce the problem that cion solves
 - c. Reference the autumn-project and what is new in the bachelor-project
 - d. Detail the big changes in an abstract model with all the components of cion. (think domain model)
 - e. The language in the document is a bit too complex, and at times not precise enough
 - f. We should have a short introduction for every subsection explaining what it describes
 - g. hardware requirements in non-functional requirements section
3. Plan until next meeting
Send the project plan and terms-document for feedback
4. Progression plan
Nothing
5. Research Question
 - a. Overarching question, what is cion attempting to solve?
 - b. Is it possible to solve?
 - c. Does cion in fact solve it?
 - d. Security. cion's weaknesses and strengths compared to aforementioned competing software
6. Additional Items
None
